Vu Tuan Kiet

AI Engineer

kietvt.personal@gmail.com — +84 367 841 487 — github.com/TuanKiet7125 — Ho Chi Minh City

Summary

Final-year Artificial Intelligence student at FPT University with hands-on experience building LLM-powered applications, Retrieval-Augmented Generation (RAG) systems, and cloud-deployed AI services on AWS. Skilled in Python, Machine Learning, Deep Learning, and data processing, with a focus on production-ready AI solutions and efficient models. Seeking an AI Engineer or Machine Learning Engineer position to contribute to end-to-end AI system design and high-impact AI initiatives.

Education

FPT University - FPTU HCM 2023 – 2027 (Expected)
Bachelor of Artificial Intelligence – GPA: 3.6/4.0 *Ho Chi Minh City, Vietnam*

Technical Stacks

Programming Languages: Python, SQL
AI & Machine Learning: LLMs, Retrieval-Augmented Generation (RAG), NLP, Deep Learning
AI Frameworks & Libraries: PyTorch, TensorFlow, LangChain, LlamaIndex
Retrieval & Search: FAISS, BM25, BGE-M3, Hybrid Retrieval, Dense Embeddings
Databases, Cloud & Tools: PostgreSQL, Microsoft SQL Server, AWS, Git, Docker
Soft Skills: Teamwork, Problem Solving, Technical Reporting, Fast Learning

Projects & Research

Dynamic Hybrid RAG for Vietnamese | Research Project, May. – Jul. 2026 View Project

- **Architected** a hybrid retrieval pipeline combining dense embeddings, **BM25** sparse matching, and **BGE-M3** with **8 Vietnamese-aware linguistic features** for Vietnamese question answering (Python, FAISS, FPT AI Factory LLM/embedding APIs).
- **Designed** a neural fusion mechanism using a lightweight **MLP** (Grid NDCG Predictor) that learns adaptive per-query weights across retrieval signals, with data augmentation for noise robustness.
- **Planned** an evaluation framework with **NDCG, MRR, MAP**, significance testing, and efficiency analysis across in-domain and cross-domain zero-shot settings; targeting a **Q3 journal** publication.

SlotHub - AI-Powered Education Platform | AWS OJT, Jan. – Apr. 2026 View Project

- **Developed** AI modules in Python, including an **intelligent chatbot** supporting both teachers and students.
- **Built** ML systems for **automated exercise generation** by educational level and **personalized learning pathways** based on student performance.
- **Integrated** AI services with backend and frontend systems and **optimized model performance** for production deployment on **AWS**.

Experience & Activities

Bootcamp - First Cloud AI Journey @ AWS Study Group Jan. – Apr. 2026
Member *Ho Chi Minh City, Vietnam*

- **Collaborated** with the team to develop and deploy the final project (SlotHub) in a cloud-based environment.
- **Gained** hands-on experience with AWS Cloud services and the AWS Management Console.

9.5AI - FPTU HCM AI Club Jul. 2024 – Jun. 2025
Member *Ho Chi Minh City, Vietnam*

- **Shared** knowledge on Python, popular Python frameworks, and AI technologies with club members.
- **Co-created** educational video content to help junior students gain practical insights into programming and AI.

Honors & Awards View Awards

SEAL Hackathon – Consolation Prize. **Spring 2026**
Excellent Student – Recognized for outstanding academic performance. **Fall 2025**
Honorable Student – Recognized for academic achievement in two semesters. **Spring & Summer 2025**

Languages

English: Professional Working Proficiency (B2 Equivalent) | **Japanese**: Elementary proficiency
